4. On 16 October, there were no naval ships off Leningrad Lightship. The following ships lay in the harbor at Kronshtadt: Two SVERDLOV-Class cruisers, [ ] and three S 4-Class submarines, [ ]. The following ships were at the dock in Kronshtadt: One four-masted bark, the ex-PADUA; the KOMSOMOLETS, with two stacks that were broader and more modern than previously, and only one yard on each mast; the ADMIRAL MAKAROV; the KRASNOYE ZNAMYA; one white-painted bark; and the OKTYABRSKAYA REVOLYUTSIYA. Alongside the OKTYABRSKAYA REVOLYUTSIYA was a pontoon crane with an estimated lifting capacity of 200 tons. A regrouping of light batteries was taking place on the OKTYABRSKAYA REVOLYUTSIYA. The guns above the middle 305 mm. mounts had been removed. Ten minesweepers of various types and five ARTILLERIST-Class submarine chasers in the 300 series were moored to the quay. An ARTILLERIST-Class submarine chaser [ ] passed in the channel.

5. On 18 October, a destroyer [ ] entered via the Morskoy Canal. The destroyer carried two radar antennas on the mast. The upper antenna was one usually used on Soviet merchant ships. The lower one was a grid-type fire control radar. (See Sketch No. 4.) Directly in front of the after 76 mm. mount, was a four-armed grid-type radar antenna with a long horn on each section. (See Sketch No. 4.)

6. On 19 October, in Kronshtadt, a large submarine [ ] was being fitted out. The light gray color contrasted with the other ships in the area. The tower was unusually long. (See Sketch No. 5.) No armament or net cutting wires or supports were visible. The submarine had two stern tubes that looked as if they could be trained horizontally. In position N59-48. E25-08, there was one SVERDLOV-Class cruiser [ ] and a SILNIY-Class destroyer [ ]. The distance between the ships was two nautical miles. The cruiser had six radar antennas, four on the foremast and two on the mainmast. The after raised mounts on the destroyer were missing. There appeared to be no other installation in their place.
